SACA is Highlighting Our Active Members!

Every two months SACA will highlight our most active member in our Newsletter and on our Facebook Page. The Board of Directors will take into consideration attendance at events, including the Speaker Series Luncheon, involvement in training classes, and participation in poles and other on-line interactions.

A pioneer of its time, Western Technologies (Western) started in Arizona in 1955 in a 180 sf masonry block building where the founder, Jim Warne Jr., broke concrete test cylinders with a manually operated 300,000 pound concrete compression break machine. As construction thrived, so did the advent of standardized testing and today, Western provides geotechnical, materials testing, nondestructive testing and environmental services throughout the southwestern United States.

Western has several registered professional engineers and geologists, trained and certified technicians and certified environmental professionals throughout the company that collectively share resources and work together to complete projects. Our materials laboratories are American Association of State Highway Transportation Officials (AASHTO) certified and are capable of performing over 650 tests.

The company owner is Royal Holdco Corp dba RMA Companies which constitutes several companies throughout the United States that perform multi-discipline services to support the built environment. Our motto is "Building Confidence from the Ground Up" as we provide whole project life cycle support through third party testing, inspection and certification.

SAFETY & TRAINING

SACA and Cochise College are offering in person OSHA 10 and OSHA 30 Training.

OSHA 10 will be held over two five-hour days while OSHA 30 will be held over six five-hour days. All days must be attended for each course. Class sizes are limited to twenty-four people, so register in advance or contact Michelle at 520-458-0488 to RSVP for a class. Due to the high demand for our first OSHA 10 training offered in August, we will be offering additional dates for OSHA 10. Please watch your emails for those announcements.

901 N. COLUMBO
SIERRA VISTA, AZ
BLDG 1200, ROOM 1205

OSHA Resources

OSHA Wildfires: Employer Responsibilities Preparedness,& More

Wildfires are common disasters that can spread quickly, particularly during dry conditions. Learning about wildfire risks and planning in advance can help protect against the destructive impacts of wildfires. OSHA and [NOAA](#) are working together on a public education effort aimed at improving the way people prepare for and respond to [wildfires](#). This page is designed to help workers and employers prepare for a wildfire and to protect themselves in the wildfire's aftermath.

The [Preparedness](#) page provides information on evacuation plans, safety zones around buildings, and equipment to have on hand in case a wildfire occurs. Preparing plans in advance can help workers get to safety before a wildfire impacts an area and can also help protect personal property.

The [Response/Recovery](#) page details hazards that may be present in areas affected by wildfires. These include safety hazards, such as unstable structures; heavy equipment and slips, trips, and falls, as well as health hazards such as heat stress, hazardous materials, carbon monoxide and other respiratory hazards.

Employer Responsibilities

Each employer is responsible for the safety and health of its workers and for providing a safe and healthful workplace for its workers. Employers are required to protect workers from the anticipated hazards associated with the response and recovery operations for wildfires that workers are likely to conduct. For additional information on Workers' Rights, Employer Responsibilities, and other services OSHA offers, visit OSHA's [Employers Page](#), [Workers Page](#) and [Publications](#).

Additional Information

Members of SACA have invested their resources to support the local construction industry. Please honor them by giving them priority when choosing business partners.

SACA has been able to support our local communities by supporting students in the Cochise College Residential Construction Program, Special Olympics and the Wounded Warriors Project. We are very grateful for the support from our members making it possible for us to support these programs.
